

Photovoltaic panel waterproofing strip

Overview

The use of Solar Panels Slot Rubber Sealing Strip eliminates gaps and protects the area below the outdoor living space from sun and rain by installing weatherstrips between the PV modules. This product prevents water droplets between the solar panels. Made from dense, UV-resistant EPDM rubber 30mm high and 34mm wide - fits solar module frames of 30mm or more. Valued at approximately USD 120 million in 2023, projections indicate a compound annual growth rate (CAGR) of 18-22% through. Superior Waterproof Sealing: This T-shaped EPDM rubber strip ensures a watertight seal for solar photovoltaic brackets and electric cabinets, preventing water ingress and protecting components from moisture damage in harsh outdoor conditions. And EPDM rubber seal strip fits in between the panels to seal the gaps, making a Solar cover a water - tight shelter, ideal for Solar car ports or structures.
