## Overview

---

If solar panels are not cleaned regularly, they can lose up to 30 percent of their energy yield annually. Accumulations of dust, dirt, and grime can block sunlight, significantly diminishing the system's output and efficiency. The accumulation of dirt, debris, and other contaminants on solar panels can speed up wear and tear. Over time, this buildup can lead to a breakdown of the. While going solar is pretty much a "set it and forget it" way to power your home with renewable energy, depending on where you live, you'll still need to clean your solar panels once or twice a year to ensure you get the maximum energy benefit from your solar investment. In this article, we'll teach you everything you need to know about how to clean solar panels manually, when and how often to clean solar panels, and why solar. Professionals recommend cleaning your solar panels every six months or more often if you live in an area more prone to air pollution, causing dust and dirt buildup.
