

Photovoltaic panels are ready for grid connection

Overview

But, do you know how to connect solar panels to the grid?

You'll need to prepare solar panels and an inverter when connecting the solar PV systems to the grid. That process is called solar interconnection, and it is what lets you power your home with cleaner energy and send any extra back. To connect solar panels to the grid, you need to install a bi-directional meter on your home. By the time your solar system is ready to be connected to an electrical network, you should be done with finding a contractor, getting permits from authorities and having solar panels installed on your roof.
