

Photovoltaic panels laid in the subway

Overview

Swiss startup Sun-Ways has launched the world's first removable photovoltaic (PV) solar plant installed directly on an active railway track in western Switzerland, with 48 solar panels set to power trains starting Apr. Despite many household and business rooftops rocking solar panels, and dedicated "farms" also soaking up the Sun's energy, there's still huge potential for harvesting much more. Sun-ways is. Switzerland's Federal Office of Transport approved the removable PV plant in October 2024. Illustration of a solar power plant on railway tracks showcasing innovative. Solar panels are set to be rolled out "like carpet" on railway tracks in Switzerland in a world-first. But there is opposition to the project on safety grounds A Swiss start-up is trialling a new way of harnessing the power of the sun – solar panels on railway tracks. The removable PV system will be tested.

Photovoltaic panels laid in the subway

[Swiss startup activates world's first PV solar plant on railway tracks](#)

Swiss startup Sun-Ways has launched the world's first removable solar power plant on active railway tracks, with passenger trains set to run over the 18 kW installation starting April 28.

[Switzerland Pilots First Solar Power Plant on Active Railway Tracks](#)

In Switzerland, a solar technology startup is making use of open spaces between railway tracks to place solar panels. The panels can collect solar power, even with trains using the railway ...

[Swiss Startup Stuns the World by Powering Trains With the First-Ever ...](#)

A Swiss startup has achieved a groundbreaking milestone by launching the world's first photovoltaic solar plant on railway tracks, promising to revolutionize renewable energy integration in ...

[The Swiss Rail Experiment: Can Solar Panels on Railway](#)

Switzerland is testing a novel approach to generate electricity for trains using solar panels installed along railway tracks. Could this initiative transform unused track space into a ...

[Solar panels under a train? Switzerland starts testing first rail](#)

Switzerland has launched what's billed as the world's first removable solar power plant on an active railway. Installed in the relatively unused space between the rails, the solar panels were ...

[Sun-Ways removable solar power plant on working railway line](#)

A Swiss startup has launched what it claims is the world's first removable solar power plant on a working railway line, a move that has the potential to revolutionize the global rollout of ...

[Solar Panels to Be Put on Rail Tracks - But Will They Work?](#)

Swiss start-up Sun-Ways has permission to trial the first removable rail track solar panels. But there is opposition to the project on safety grounds. A Swiss start-up is trialling a new way of ...

Solar power project hits the rails with between-track panel pilot

Swiss startup Sun-Ways is looking to do just that by installing solar panels in between railway tracks. Despite many household and business rooftops rocking solar panels, and dedicated

Solar panels will be rolled onto Swiss railway tracks 'like a carpet'

Solar panels are set to be rolled out "like carpet" on railway tracks in Switzerland in a world-first. Swiss start-up Sun-Ways has been given the green light for a three-year pilot project in

Revolutionary Solar Panels Installed on Swiss Railway Tracks

Swiss startup Sun-Ways has launched the world's first removable photovoltaic (PV) solar plant installed directly on an active railway track in western Switzerland, with 48 solar panels set to
