

# Photovoltaic support medium voltage board

## Overview

---

The pre-assembled and cost-effective solution is integrated into a prefabricated 20ft container, ideal for easy transportation and quick installation. The Plug-and-Play design makes grid connection exceptionally easy and rapid, and the modular architecture allows for simplified. In order to ensure maximum performance and availability during the lifetime of a solar substation, we offer various options for life-cycle support, from basic maintenance to 24/7 protection and multiple after-sales packages. ABB's Low. GoodWe Medium-voltage Station, a compact step-up power center, is capable of withstanding various types of environments. As a result, you'll be able to value tage levels and current and fault ratings. There's no need to contact or coordinate other subcontractors. , MV switchgear and signaling interfaces for the PVS800 inverter station. The solution is the ideal.
