

Pre-job training for photovoltaic panel operators

ESS

Overview

As the utility-scale solar sector expands, our comprehensive online course prepares entry-level O&M technicians to be job-ready from day one, while helping companies scale operations quickly and safely without costly in-house training. Start building the future of solar O&M today. Solar design and installation training prepares workers to properly design, install, and maintain these solar energy assets. Training can take many forms based on the target audience and topic area, such as a high school career technical education (CTE) program, an undergraduate or graduate degree. The Solar Photovoltaic (PV) System Installer curriculum helps learners seeking careers as entry level or advanced solar PV installation technicians in this fast-growing field. In the Advanced Solar Photovoltaic (PV) Technician, Pre-apprenticeship program, you can earn industry-recognized credentials from organizations such as the National Association. SEIA developed this page as resource for solar employers looking to explore, develop, or participate in registered apprenticeship programs.

Pre-job training for photovoltaic panel operators

[Solar Photovoltaic \(PV\) Technician, Pre-Apprentice](#)

Solar Photovoltaic (PV) Technician, Pre-Apprentice Training for free at Job Corps Centers near you, find more information to start your career

[Solar Apprenticeship Programs: DOL Approves New Guidelines](#)

For the solar industry, these new apprenticeship guidelines offer a clear pathway for individuals looking to enter the clean energy workforce. They also help companies establish ...
