

Price of a 40-foot solar-powered container for farm use

Overview

A standard freight farm container could cost between \$50,000 to \$100,000. This price typically includes a repurposed 40-foot shipping container, fully equipped with vertical farming technology, climate controls, hydroponic systems, LED lighting, and IoT monitoring systems. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. Hydroponic container farms offer a clean, efficient way to grow food year-round without soil or farmland. Containers come in sizes like 20 ft, 40 ft, and 45 ft—customizable for different crop volumes and growing setups. Add-ons like water recirculation, solar panels, and remote monitoring boost. Prices can vary significantly depending on the size, outfitting, and the technology embedded within. It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. These systems are revolutionizing urban agriculture by enabling year-round, sustainable food production in compact spaces. Equipped with durable 480W PV panels, it supports manufacturing zones or logistics hubs where autonomous power is essential.
