This item can be returned in its original condition for a full refund or replacement within 30 days of receipt. We work hard to protect your security. Item as described, well packed and shipped quickly. It achieves very high efficiency with a switched capacitor architecture in applications with an input-to-output voltage ratio of 2:1 (divider), 1:2 (doubler), or 1:1 (inverter). Price and other details may vary based on product size and colour. This device inverts, doubles, divides or multiplies a positive input voltage. It is pin compatible with the industry standard ICL7660 and LTC1044 devices. 5V to 10V with no external. This device is designed to work in conjunction with a Variable Frequency Drive (VFD) for 240V 3-phase motors, using a 120Vac power line as the input.
