[VIEW MORE](#)

Overview

A database of currently available EV models and their real world performance based on Bjørn Nyland's tests. Recently circulating on Weibo is a video of a North Korean electric car. However, the car is actually a rebadged BYD Han. The video gives the range of the cars as 720 km and the dragon face and Chinese knot. This cheatsheet shows all electric vehicles sorted by range. An empirical analysis of new vehicle registrations from 2019 to 2022 shows that investing in charging facilities is more cost-effective than offering purchase incentives for increasing BEV adoption.

Pyongyang electric vehicle range
