

Rabat green electricity

Overview

On November 3, in Rabat, Morocco signed a significant agreement with ONEE, Masen, and ANGSPE to produce up to 5 gigawatts of renewable energy by 2030. This milestone aims to enhance the country's energy sovereignty and promote green industrialization. Renewable energy currently accounts for 46% of Morocco's installed electricity capacity, with the country targeting an increase to over 52% by 2030. Marrakech – Head of Government. On Monday, November 3, in Rabat, the Moroccan government, the National Office of Electricity and Drinking Water (ONEE), Masen, and the National Agency for Strategic State Participation Management (ANGSPE) signed a major agreement aimed at producing up to 5 gigawatts of electricity from renewable energy sources. An agreement concerning electricity production projects from renewable energy sources was signed on Monday in Rabat under the chairmanship of the Head of Government, Aziz Akhannouch. The agreement aims to implement integrated projects for the production of electricity from renewable energies, as Morocco's Head of Government, Aziz Akhannouch, presided over the signing of a landmark energy convention in Rabat on Monday, aiming to accelerate the provision of 5 gigawatts of green electricity to the country's industrial sector by 2030. This isn't just a train station—it's a transport hub where everything connects. Step off the high-speed train from Tangier, and you can immediately hop on a tram, catch an electric bus, or grab a taxi.
