

Reasons for not using solar power

Overview

Top reasons why everyone doesn't use solar panels include solar scams, lingering misconceptions about the solar industry, misleading advertising and unmatched expectations, distrust of aggressive sales teams, and difficulty comparing solar panels. The two biggest problems are cost. Solar power's been making waves as a clean, renewable energy source, but not everyone's on board yet. You might wonder, with all the buzz around sustainability, why isn't everyone harnessing the power of the sun?

Despite the obvious benefits, there are still hurdles that keep solar power from being. Solar panels are worth it for most homeowners, as long-term savings and increases in property value make up for the high initial installation costs. Whether solar panels are worth it depends on where you live, your budget, your roof's characteristics, incentives, and how much energy you use. Solar. With energy prices soaring, residential solar is becoming a meaningful cost-savings measure for more and more households. Sound familiar?

If so, you're not the only one. Unfortunately, most of these “drawbacks” are actually myths, and they may be preventing you from. On first inspection, you might think it bonkers that someone wouldn't want solar panels. After all, they produce free and clean electricity.
