

Renewable electricity sofia

Overview

Experts agreed that Bulgaria is moving toward a hybrid energy future, integrating battery storage and wind power to complement the solar boom. Bulgaria is experiencing strong growth in large-scale solar development and grid connection upgrades. Installed solar PV capacity has jumped from 1,300 MW in 2021 to over 4,500 MW by Q1 2025, driven by a robust pipeline of utility-scale projects. With solar booming, battery energy storage is now. In October 2025, ManagEnergy Expert Francisco Puente travelled to Bulgaria to support SOFENA - the Sofia Energy Agency - in strengthening the development of energy communities across the region. The system is envisaged to generate 12 GWh of electricity per year. Mostly owned by local authorities and underfunded, water and sewerage utilities in. The first day of the RE-Source Southeast Conference in Sofia, Bulgaria, this week underscored European and regional interest in renewable-energy projects based on corporate power purchase agreements (PPAs). In partnership between Solar Academy Bulgaria and M3 Communications Group, Inc.
