

# Residential solar battery prices

## Overview

---

As of early 2025, the average cost to install a home solar battery in the U.S. ranges between \$9,000 and \$18,000 before incentives. Switch to solar with a system built for you. Some smaller batteries cost just a few hundred dollars, while premium systems can exceed \$30,000. Clicking “Get Your Estimate” submits your data to All Star Pros, which will process your data in accordance with the All Star Pros Privacy Policy. By submitting your information, you. But one of the first questions homeowners ask is: how much does a solar battery actually cost in 2025, and what will change in 2026?

The answer depends on the size, type, and brand of battery you choose, as well as where you live and what incentives you qualify for. Why such a wide range?

The biggest factor is size, measured by how many kilowatt-hours (kWh) of electricity the battery can store. Battery systems can range. Prices vary by installer, but here's what you can expect for popular brands in 2025 (installed cost): Tesla Powerwall 3: Sleek design, 13.5 kWh capacity, top-tier software.
