

# Resort uses off-grid solar energy storage cabinet three-phase

## Overview

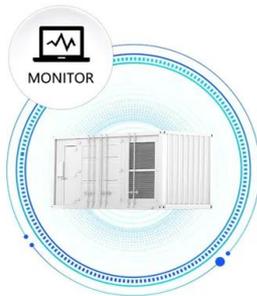

---

Within its pursuit to be fully sustainable, Cheetah Plains decided to abandon its single-phase grid supply in order to implement a more powerful three-phase power system by a solar photovoltaic (PV) facility and a high-quality lithium ion battery energy storage system (BESS). Thirty miles off the Pacific Coast of Panama is an Eco Island Adventure Resort fully supported by solar, battery, and generators with no utility connection. The power system supports dozens of guests and a staff of 150. NewGrid oversaw the implementation of approximately 2 megawatt hours of lithium. The project deploys 1 unit of 125kW/258kWh energy storage cabinet paired with 1 unit of 125kW PCS (Power Conversion System). The PCS enables high-efficiency bidirectional power conversion and precise energy flow management, ensuring stable operation of the resort microgrid. A 125kW/258kWh energy. We are proud to have delivered a 250kW three phase off grid solar system for a luxurious five-star resort located on a private island in Panama. Automatically activate. Located in the world-famous Sabi Sand Game Reserve, the newly renovated Cheetah Plains lodge offers ultimate luxury in the middle of the bush.
