This means they do not. Some PV solar systems provide the option of storing extra electricity in batteries, which can be especially beneficial in buildings that cannot tolerate a lapse in their power supply. Now the solar industry is. Solar PV has low physical complexity and operational requirements, which facilitate strong strategic returns in terms of reputation and customer acceptance, as well as a financial payback of around 15 years [1] So why rooftop solar?

Competitive Advantage: An abundance of roof space, and a captive. If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.
