

Romanian power station energy storage benefits

Overview

In addition to developing production capacities, Romania has also invested in increasing electricity storage capacity, which is essential for the stability of the National Energy System. BUCHAREST, Feb 5 (Reuters) - Private energy developer Mass Group Holding plans to invest 1 billion euros (\$1.18 billion) in battery storage capacity across central Romania, the government said in a statement on Thursday after meeting the company. 5 GW power storage investment would be. Mass Global Energy Rom has announced a new strategic investment of approximately €1 billion in Battery Energy Storage System (BESS) capacities, bringing its total commitment to the Romanian energy sector to over €2. Power, Hidroelectrica, Engie and more big names. Recent updates about investments in battery energy storage. Romania, located in the north-eastern part of Europe's Balkan Peninsula, is expected to be one of the fastest-growing countries in Europe's new energy market, thanks to its rich natural resources and optimising policy environment.
