

School invests in 20-foot folding shipping containers

Overview

The containers used are primarily 20-foot containers. They have been modified to serve as functional classrooms, equipped with windows, insulation, and amenities tailored for a comfortable learning environment. Shooters Hill School has incorporated shipping container classrooms. The school has repurposed six shipping containers to create additional classroom space. These rugged, modular units are proving to be practical long-term solutions that balance speed, cost, and flexibility. From storage for maintenance gear to seasonal sports. The National Education Association estimates that it will cost \$322 billion in taxpayer dollars to update public schools that are not currently up to modern standards.
