

Self-service photovoltaic site investment

Overview

The model works as follows: a company looking to lower its carbon footprint across multiple sites enters a partnership with an energy service provider to deliver electricity via solar panels installed at the client's facilities, without the client needing to purchase or maintain. The model works as follows: a company looking to lower its carbon footprint across multiple sites enters a partnership with an energy service provider to deliver electricity via solar panels installed at the client's facilities, without the client needing to purchase or maintain. Third-party financing is a well-established financing solution in the United States, having emerged in the solar industry as one of the most popular methods of solar financing. Third-party solar financing predominantly occurs in two forms: solar leases and power purchase agreements (PPAs). In the. Market Explosion: The global Solar as a Service market has reached \$4.2 billion in 2024 and is projected to exceed \$12.3 billion by 2030, with a 3% compound annual growth rate, driven by increasing demand for accessible renewable energy solutions that align with corporate sustainability. Solar PPA: A PPA allows us to build, own, and operate the solar system on your property. You do not pay for the system itself. Instead, you pay a fixed amount for the power it creates, which is typically less than the rate charged by your utility company. What is Community Solar?

Community solar. A solar power purchase agreement (PPA) is a financial agreement where a developer arranges for the design, permitting, financing and installation of a solar energy system on a customer's property at little to no cost.
