

Serbia factory produces energy storage container batteries

Overview

The Serbian company ElevenEs has opened a plant for the production of battery cells. “The ElevenEs team is already working on increasing the production. Some of the current market prices for lithium-ion batteries are below cost and will not last forever but Europe still needs to be more cost-competitive, the CEO of one of Europe's first LFP manufacturing facilities told Energy-Storage. It is the first lithium iron phosphate (LFP) battery cell factory in Europe, it added. ElevenEs, backed by EIT InnoEnergy cross a variety of applications, including electric cars, buses, trucks, and energy storage systems. - LFP batteries are more affordable, durable, sustainable and safer than competing solutions, and they do not require.
