### [How does solar power work?](#)

Is Solar Power A Clean Energy Source? When Was Solar Power Discovered? How Exactly Is Electricity from Solar Energy produced? What's The Difference Between Solar PV Panels and Solar Thermal Panels? What Are Solar Farms? Can Solar Power Be Generated on A Cloudy Day? Who Are The Largest Producers of Solar Power Worldwide? Solar panels are usually made from silicon, or another semiconductor material installed in a metal panel frame with a glass casing. When this material is exposed to photons of sunlight (very small packets of energy) it releases electrons and produces an electric charge. This PV charge creates an electric current (specifically, direct current or DC) See more on [nationalgrid gobesolar](#)
