Access Solcast's live solar data and PV power data with 3D cloud modelling, updated every 5-15 mins, powered by live satellite data and live cloud tracking. High-resolution satellite imagery is processed within minutes. Our public solar displays support many of the world's leading solar Monitoring Systems and Data Loggers. Therefore, not only are different inverter types able to be visualized, but cross-vendor visualization is also a possibility, regardless of location and number of systems. Explore implementation strategies, cost-benefit analysis, and real-world success stories in our 2024 guide. You know what's kind of wild?

Over 2.3 million households globally now stream. Imagine watching 3,500 solar panels being installed on a football field-sized rooftop in real-time - complete with drone shots of workers dancing the "safety shuffle" between modules. 5 terawatts by 2030 [fictitious citation: 2023 Gartner Emerging Tech Report], understanding photovoltaic panel construction has never been more critical.
