

Small water pump with photovoltaic panels

51.2V 300AH

Overview

A solar powered water pump is a water-lifting system powered entirely by energy from the sun. It replaces electric or fuel-powered pumps by using photovoltaic (PV) solar panels to drive water from sources like ponds, wells, rivers, or boreholes —even in the most remote places. Check each product page for other buying options. Discover more about the small businesses partnering with Amazon and Amazon's commitment to empowering them. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's. Uses item details. With adjustable flow and 4 different fountain heads, this small but powerful water fountain is perfect for birdbaths, fish ponds, small fountains, small-scale irrigation, and other.
