

# Solar Photovoltaic Panel Lifting Position

## Overview

---

Always insert the fork from the short side of the pallet, as long as it is safe to do so. Use forklifts with a backrest greater than 48 inches. Lifting these substantial and often delicate panels to the rooftop is not a simple task. With global solar installations expected to reach 350 GW annually by 2025 (IEA 2023 data), contractors need. Modern solar panel lifting equipment uses vacuum technology and ergonomic design to make handling fast, precise, and effortless. Modern photovoltaic mounting systems have evolved into solar ballet dancers - they need to be strong yet flexible, durable yet.
