

Solar Photovoltaic Power Generation Grounding

Overview

The National Electrical Code (NEC) Sections 690.47(C)(3) allow combined AC and DC grounding and bonding based on system design and requirements, in accordance with NEC Article 250. Grounding (also known as earthing) is the process of physically connecting the metallic and exposed parts of a device to the earth. It is a mandatory practice required by NEC and IEC codes to protect both equipment and personnel from damage and electric shock hazards. It protects against electrical shocks, safeguards expensive equipment, and ensures stable performance. Solar ABCs, with support from the U. In this guide, we'll walk you through the ins and outs of solar.
