

Solar container battery warranty standards

Overview

Unlike solar panels or inverters, which normally carry 25-year warranties, solar battery warranties are often far shorter. The industry standard for batteries is 10-12 years; the timeframe is influenced by the battery's chemistry and rarely will manufacturers offer a warranty for. In this blog, we'll break down everything you need to know about battery warranties, including the difference between cycle warranties and throughput warranties, how degradation works, and what that "80% capacity after 10 years" really means for you. A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery. Battery warranties typically won't reimburse for labor costs associated with. The lifespan of a solar system battery refers to how long it will reliably store and discharge electricity before its performance significantly declines. The more you know about warranty details, like.
