

Solar generator with drying function

Overview

Brief Answer: Yes, a solar generator can power a dryer, but only if it provides enough wattage output. The process of drying involves simultaneous heat and mass transfer. The overall energy balance of a product, when subjected to solar drying, can be given using Eq. Can a solar dryer. Solar dehydrators offer an eco-friendly alternative that harnesses the sun's power to dry your favorite foods while maintaining their nutritional value and flavor. Food is improved for storage, transit, and consumption when its moisture and enzyme inhibitors are removed through dehydration.
