Solar Photovoltaic (PV) system as a source of renewable electricity. Solar electric power can be made available continuously for consistent on-off grid applications. It is environmentally friendly as well. Solar mounting panels are necessary to increase the efficiency and probability of the solar. This includes iron sheet/ground roof solar panel bracket installation, tile/slate roof solar panel bracket installation, aluminum ground bracket installation, concrete/sand installation bracket, etc. First, there are many fixing methods, such as pile foundation. Tile roofs offer excellent structural stability and longevity for solar installations, commonly lasting 50-100 years depending on material composition. In the specific installation process, it is necessary to choose the appropriate.
