

Solar power tax incentives

Overview

The 2022 Inflation Reduction Act (IRA) had promised generous, decade-long tax credits for clean energy (including a 30% credit for home solar installations). However, a mid-2025 budget law – officially the One Big Beautiful Bill Act (OBBBA) – rolled back many of these incentives. If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. Tax benefits are available to taxpayers who generate their own electricity from solar power generation systems whether the system is for personal or business use. The credit for solar upgrades was extended through 2025, empowering more homeowners to switch to solar. We're here to help you navigate.
