

Solar power with grid backup in Monaco

Overview

This website is an interactive map that allows users to easily identify every roof in Monaco, its potential solar resource, the exploitable area on which photovoltaic panels could be installed, and the possible annual electricity production. Monaco's first large-scale solar panel installation has been officially inaugurated at the prestigious Monte-Carlo Bay Hotel. This landmark project marks a significant step in the Principality's commitment to reducing carbon emissions, a core objective outlined in its ambitious Energy Transition.

Geographical Location: Monaco is a sovereign microstate located on the French Riviera in Western Europe, bordered by France on three sides and the Mediterranean Sea on the fourth. Despite its small size of just 2. The most common types of renewable energy in Monaco come from sunlight and wind power.
