Overview

The most common and innovative application is installing solar panels on shipping containers. These solar containers are designed to house all the necessary components for solar energy production and storage, offering a customizable, portable, and flexible energy. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential appliances (air-conditioners, computers, lights, microwaves and more). Learn more about the product and inquire below.
