

Southeast Guizhou Grid-connected Solar Power Plant

Overview

The project is located in Guanling County, Anshun City, Guizhou Province, with a total investment of 4.828 billion yuan and a planned capacity of 1330 MW, which is the largest photovoltaic power station in Guizhou province and the first million-kilowatt photovoltaic base. According to China Power news, recently, the Guanling County Panjiang million kilowatt photovoltaic base project contracted by the Southwest Power company is fully connected to the grid. An aerial drone photo taken on Aug. In recent years, Guizhou Province has accelerated the construction of a new comprehensive energy base with well-ordered steps to build advanced coal-fired power generation units and. Solar N Plus has announced that the 80MW solar power station has successfully connected to the grid in Panzhou, Guizhou Province, China. Equipped with our high-performance SNP 575W modules, this project is set to generate an impressive 139 million kWh of electricity annually, saving about 43,000. CGN Guizhou Solar PV Park is a 94MW solar PV power project. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It will be developed in a single phase. [Photo/Xinhua] GUIYANG -- In the high-altitude areas of Southwest China's Guizhou province, residents used to grow potatoes and buckwheat for a living.
