## Overview

---

With record growth in 2024 and new projections through 2029, the study highlights key market drivers, regional developments, and essential policy recommendations. The report explores trends and forecasts across residential, commercial & industrial (C&I), and utility-scale battery segments, offering deep insights into Europe's energy storage landscape. Lithium-Ion Battery. The European battery storage market grew by 15% in 2024, reaching 61. Battery storage is no longer an optional add-on—it has. This dramatic shift transforms the economics of grid-scale energy storage, making it an increasingly viable solution for Europe's renewable energy transition. What if we told you shipping container-sized solutions could capture that lost power?
