

Southern Region New Energy Storage Project

Overview

The facility's state-of-the-art battery energy storage system marks a significant step forward in providing clean power and improved grid resiliency in Orange County and the Southern California Edison Southwest LA region, while also reducing the carbon footprint of the regional grid. —became operational, collectively delivering 600 MW of solar power and 390 MW of storage. These projects now provide clean energy to approximately 270,000 powered vehicles from the roads or planting 6.5 million trees and growing them for 10 years demands on our grid,” said Ted Bardacke, chief. STANTON, Calif. -- (BUSINESS WIRE)--In a significant step towards clean, resilient power, Wellhead, W Power, and Energy Vault have announced the commencement of the Stanton Battery Energy Storage System (SBES) in Stanton, California. As the demand for sustainable energy solutions intensifies, Southern Company is actively developing and deploying BESS to. A report from the American Clean Power Association (ACP) and Aurora Energy Research indicates that the Southwest Power Pool (SPP) is projected to experience the highest percentage increase in peak load growth over the next decade among all Regional Transmission Organisations (RTOs).

Southern Region New Energy Storage Project

[New Southern California Energy Storage Project Launches, Delivering](#)

State and local energy leaders joined company representatives to celebrate the launch of the 68.8 MW/275.2 MWh system, one of the largest energy storage systems in Southern California.
