

# Spain equipped with wind power and energy storage

## Overview

---

The new climate plan includes higher targets for solar and wind power capacity as well as energy storage. Spain plans to double its 2030 biogas production target and almost triple its “green hydrogen” goal as part of its climate goals. Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. The goal is to improve how Spain uses renewable energy. Over half of Spain's electricity was generated from renewable energy in 2023, and a new government proposal sets a goal of 80 percent by 2030 at a cost of \$322 billion. Spain's new government goal to double wind capacity means it would need to almost triple wind installations from current annual. Renewable energy will cover almost half of the world's electricity demand by 2030, according to the Renewables 2024 report by the International Energy Agency (IEA), thanks to strong growth and planned projects.

## Spain equipped with wind power and energy storage

---

### [Envision Energy and GES Partner to Scale Energy Storage and Wind ...](#)

Starting from Spain, we will jointly expand across Europe's growing energy storage and wind sectors, setting a new benchmark for integrated service excellence and advancing Europe's

### [Spain second country in world for stand-alone battery-based electricity](#)

With a significant deployment of renewable energy capacity, Spain stands out in this report for two factors that go beyond traditional solar energy and wind sources in the field of storage.

### [Installed capacity \(Wind\) . System reports](#)

Wind power is the leading technology in the installed capacity structure of four autonomous communities, starting with Castile and Leon, where it accounted for 47.8%, Aragon with ...

### [Enlight adds PV, BESS to Spain's largest wind farm](#)

Enlight Renewable Energy is expanding its Gecama Wind Project in Spain, by integrating solar PV and battery energy storage systems (BESS).

**TAX FREE**

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW/115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

ENERGY STORAGE SYSTEM

### [Spain Increases its Renewable Share but Soon May Need to Replace ...](#)

According to a draft government report issued in June, Spain's goal is to raise the share of renewables to four-fifths by 2030. The new climate plan includes higher targets for solar and wind ...

### [Spain opens EUR350 million funding round for wind repowering and ...](#)

Spain, which has seen its renewable energy generation capacity increase in recent years, has announced it has opened a EUR350 million funding round aimed directly at the wind ...

### [Spain's EUR700 Million Plan to Boost Energy Storage and Renewable Power](#)

The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms. Spain's electricity grid already generates more than half of its power ...

## Wind power in Spain

Local possession of wind power is not present in Spain, but does not appear to take away from further development of wind power in Spain since a much smaller and weaker quantity of local anti-wind ...

[Over 2.3 GW of storage in processing and 25 projects progressing in](#)

Project locations are spread across much of Spain, with notable concentrations in Castilla-La Mancha, Castilla y León, Extremadura, the Valencian Community, Catalonia and ...
