

The function of the pull rod of the photovoltaic bracket

Overview

The utility model can facilitate an operator to adjust the angle of the photovoltaic panel, and further adjust the angle of the photovoltaic panel so as to adapt to different illumination angles of more areas. The system fully utilizes the strong tension ab rong load capacity, and adaptability to complex terrains. The ailure mode of the new structure is discussed in. Photovoltaic mounting systems (also called solar module racking) are used to fix solar panels on surfaces like roofs, building facades, or the ground.
