

The largest energy storage project in Algeria

Home Energy Storage (Stackble system)

High Efficiency

Easy installation

Safe and Reliable

Perfect Compatibility

Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with inverter to avoid the compatibility problem

- LFP battery, safest and long cycle life
- Stackable design, effortless installation
- Capable of High-Powered
- Emergency-Backup and Off-Grid Function

Overview

The Hassi R'Mel gas field, one of the largest in the world, is central to a \$2.3 billion project designed to optimize gas flow efficiency to Europe. Led by engineering companies Maire Tecnimont and Baker Hughes, the project will involve the construction of three gas boosting stations and an upgrade. Discover how Algeria's Oran region is leading North Africa's energy transition through cutting-edge storage solutions. With solar irradiation levels exceeding 2,000 kWh/m². Despite launching Africa's largest solar park (1GW in Timimoun) last January, Algeria faces a critical energy storage gap. Solar plants currently operate at 25% average capacity utilization - their peak generation mismatched with evening demand surges [2]. What are Algeria's key energy projects in 2025?

Algeria is advancing several key energy projects in 2025, aimed at. ALGIERS, April 12 (Xinhua) -- Algeria's Energy Ministry announced Saturday that the state-owned mining group Sonarem has signed a "strategic" agreement with renowned battery expert Karim Zaghbi to develop a complete lithium iron phosphate (LFP) battery value chain in the country. And two of them were signed by Algeria and Chinese company.
