

The latest power grid micro-film show

Overview

“Grid Down, Power Up”—a new documentary narrated by actor Dennis Quaid—explores this growing national security threat, as well as policy solutions to fix it. The modern power grid is the silent engine of our lives—powering cities, homes, factories, and digital dreams. But how does it really work?

From aging infrastructure and blackout risks to the global shift toward smart grids and clean energy, this eye-opening documentary dives deep. It is explained how we became this vulnerable, and how we can resolve it going forward. Outlines the risk and consequences of the US power grid going down. Grid failure is a real and imminent threat, a devastatingly deadly occurrence leading to life-threatening shortages of heat, food, and water.
