

# The price of solar modules is too low

## Overview

---

Massive global solar oversupply has pushed module prices below \$0. PV module prices have fallen by around 5% to 8% across all technology classes in recent weeks, says Martin Schachinger, the founder of pvXchange. This means that prices are moving strongly back toward the level we saw at the beginning of the year, which can only be described as unhealthy for. Global panel prices are now at all-time lows due to a glut of supply and improvements in the efficiency of manufacturing. 53 per watt, which is down from more than \$7 per watt in the early aughts. Customers can explore EnergySage 's free tools to get quick solar installation estimates and compare quotes.

## The price of solar modules is too low
