

Uganda needs several communication base stations EMS

Overview

Learn about Uganda's approach to EMF and mobile base stations, including general information, status quo, interventions, lessons learnt/challenges, and future plans. Discover key concerns, legal frameworks, collaborations, and more. The objectives of the plan, stated by Uganda's Ministry of Energy and Mineral Development (MEMD), are: Provide universal access to electricity and cleaner cooking by 2030. Modernise and diversify Uganda's energy mix and promote its efficient use across all sectors to support industrial growth. This work is a product of the sta of The World Bank with external contributions. As of March 2022, there were 30. 6 million mobile phone subscribers and more than 4300 base station sites, thus t is increase calls for the development of base stations for the end. Airtel Uganda Limited is the second largest mobile communications and information technology service provider in Uganda with 10 million subscribers, accounting for 42 percent market share. An Image/Link below is provided (as is) to download presentation.
