

Uninterruptible power supply battery power for communication base station

Overview

The UPS battery is designed to bridge the gap during power failures by providing a seamless supply of power. This instant backup is critical in ensuring that the sensitive electronics within telecom base stations continue to operate without interruption. This is where Uninterruptible Power Supply (UPS) systems. When natural disasters cut off power grids, when extreme weather threatens power supply safety, our communication backup power system with intelligent charge/discharge management and military-grade protection becomes the "second lifeline" for base station equipment. 45V output meets RRU equipment. The Power-Pac offers peace of mind for the system designer or base station operator This unique power supply assures that a base station can remain up and running to power communications when it is often needed most - during a power outage.

Uninterruptible power supply battery power for communication bas

Operating on Battery Back Up
Features
General Specifications
Protection
Mechanical Details
Battery Details
Options
Highly regulated, low ripple, noise-free 12 volt output
Built-in, "on-line" stand-by battery provides immediate back-up power in case of AC power loss
Internal mounting space and terminals for conversion of 7 A/H model into 14 A/H model
Output "Normal" indicator L.E.D.
