

# Vanadium liquid flow battery manufacturing project

## Overview

---

A CNY 2 billion investment will go into building a 300 MW all-vanadium liquid flow electric stack and system integration production line, alongside facilities to produce 100,000 cubic meters of all-vanadium liquid flow electrolyte and 10,000 ton of high-purity vanadium pentoxide. The all-vanadium liquid flow industrial park project is taking shape in the Baotou city in the Inner Mongolia autonomous region of China, backed by a CNY 11. Meanwhile, China's largest vanadium flow electrolyte base is planned in the city of Panzhihua, in the. Located in the Hongqiqu Economic and Technological Development Zone in Linzhou, the project spans approximately 143 acres. Image Credit: luchschenF/Shutterstock. Located in Jimusar County, Xinjiang, the project provides a total installed capacity of 200 MW / 1,000 MWh, enabling up to five hours. □ Summary □ This summary collates key developments in China's vanadium flow battery and energy storage sector from June to July 2025, covering policy releases, project implementations, technical standard issuances, and SOE-private collaborations, highlighting industrial scaling and. A giant solar-plus-vanadium flow battery project in Xinjiang has completed construction, marking a milestone in China's pursuit of long-duration, utility-scale energy storage. China has completed the main construction works on the world's largest vanadium redox flow battery (VRFB) energy storage.

## Vanadium liquid flow battery manufacturing project

---

Solar

### [China to host 1.6 GW vanadium flow battery manufacturing complex](#)

The all-vanadium liquid flow industrial park project is taking shape in the Baotou city in the Inner Mongolia autonomous region of China, backed by a CNY 11.5 billion (\$1.63 billion)

### [UK Flow Battery To Be Tested In US](#)

Vanadium flow battery technology from the UK will be the first to go through its paces at a new energy storage test facility in the US.

### [Why Vanadium Batteries Haven't Taken Over Yet](#)

Explore how vanadium redox flow batteries (VRFBs) support renewable energy integration with scalable, long-duration energy storage. Learn how they work, their advantages, ...

### [China completes world's largest vanadium flow battery plant](#)

A giant solar-plus-vanadium flow battery project in Xinjiang has completed construction, marking a milestone in China's pursuit of long-duration, utility-scale energy storage.

### [China to host 1.6 GW vanadium flow battery manufacturing complex](#)

A CNY 2 billion investment will go into building a 300 MW all-vanadium liquid flow electric stack and system integration production line, alongside facilities to produce 100,000 cubic meters of ...

### [100MW/600MWh Vanadium Flow Battery Energy Storage Project ...](#)

The Linzhou Fengyuan 300MW/1000MWh project highlights the transformative potential of vanadium flow battery technology in large-scale energy storage. Its exceptional cycle life and ...

### [World's Largest Vanadium Flow Battery Project Operational](#)

The Jimusar project demonstrates the unique advantages of vanadium flow batteries for utility-scale applications: Liquid electrolytes in external tanks separate power from energy capacity, ...

### [World's largest vanadium flow battery project completed in China](#)

A firm in China has announced the successful completion of world's largest vanadium flow battery project - a 175 megawatt (MW) / 700 megawatt-hour (MWh) energy storage system.

### [China's Vanadium Flow Battery Storage Sector Updates \(Jun-Jul 2025\)](#)

Jimsar, Xinjiang: China's largest all-vanadium flow energy storage project (100 MW/400 MWh) was completed, reducing annual CO2 emissions by 1.6 million tons and enhancing grid ...

### [Prospects for industrial vanadium flow batteries](#)

At the end of the useful life of the plant, all electrolyte components (vanadium, water, and sulfuric acid) can be easily separated by precipitating electrochemically oxidized vanadium, resorting ...
