

Vatican city off-grid solar

Overview

Pope Francis has ordered the construction of a solar power plant to supply the Vatican's electricity needs. Vatican City is powered by solar. On , the Vatican City officially transitioned to solar power, marking a significant shift in the European energy landscape. The heart of this change is located at Santa Maria di Galeria, a former Vatican Radio site that has been transformed into a solar. ROME (AP) — Italy agreed Thursday to a Vatican plan to turn a 430-hectare (1,000-acre) field north of Rome, once the source of controversy between the two, into a vast solar farm that the Holy See hopes will generate enough electricity to meet its needs and turn Vatican City into the world's first. Italian energy supplier ACEA installed the photovoltaic roof in just six months in the Courtyard of the Corazze entrance. “The most difficult thing is to integrate and find spaces to build photovoltaic infrastructure in places that are already heavily built up,” said ACEA president, Barbara. In line with the principles of the encyclical *Laudato Si'* and a United Nations agreement on climate change, Pope Francis is making the Vatican "greener. Photo: Vatican Media According to the Vatican's press office, the installation will apply the most advanced solutions currently. The Vatican City, the heart of the Catholic Church and a symbol of religious heritage, is becoming a beacon of modern sustainable practices with its adoption of solar energy.
