

Vietnam Solar Power Expert

Overview

This article examines Vietnam's key policies and models that have played a crucial role in driving the expansion of solar energy. They can provide guidance for addressing market challenges, drawing in new investments, and advancing a country toward its climate targets. The country's updated Power Development Plan 8 will continue this trajectory, with solar making up most of the country's energy supply by 2050. A lecturer in Electronic and Computer Systems Engineering at RMIT Vietnam, Dr. According to World Wildlife Fund Vietnam (WWF-Vietnam), Vietnam's solar energy is evaluated as having high development potential renewable energy (RE) sources. [2] On average, the solar radiation ranges from 1,300 to 2,900 kWh per year, increasing towards the southern regions. Solar power has emerged as a key component of Vietnam's strategy to diversify its energy portfolio and reduce its carbon footprint. Recent developments of the.
