

## Overview

---

The UL-445M-144 solar panels have a rated output of 445 Wp and an impressive efficiency of 20.14 %, making them an excellent choice for homeowners looking to harness the power of the sun and reduce their energy costs. The same goes. Solar panels receive their ratings under specific testing conditions known as “Standard Testing Conditions” or “STCs”. These conditions serve as the industry standard for evaluating solar panels, making it easier to compare panels accurately. This nameplate data provides crucial information about the panel's performance and.
