

What is the job of a person who installs photovoltaic panels

Overview

Solar photovoltaic installers assemble, install, or maintain solar photovoltaic systems on roofs, sides of buildings, poles, and the ground according to plans made by solar energy systems engineers. They may measure, cut, assemble, and bolt structural framing and solar modules. But what is a solar photovoltaic installer — and what do they do?

Also known as a solar panel installer, a solar PV installer is a skilled tradesperson who installs solar panels and support structures on residential, commercial, community and utility-scale projects. Most solar panel installations are done outdoors, but PV installers sometimes work in attics and crawl spaces to connect panels to the electrical grid. Learning about the requirements and responsibilities can help you determine if being a solar energy technician is right for you.

What is the job of a person who installs photovoltaic panels
