

# What modules are installed in the energy storage cabinet

 **TAX FREE**    

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

**ENERGY STORAGE SYSTEM**

The image shows a white energy storage cabinet with a green horizontal stripe and the text 'ENERGY STORAGE SYSTEM' on the front. The cabinet has a door on the left side and a control panel on the right side. The background of the image is a light gray gradient.

## Overview

---

An energy storage cabinet is a device that stores electrical energy and usually consists of a battery pack, a converter PCS, a control chip, and other components. charging modules for your electric monitoring within the energy storage cabinet. Compared to traditional 20/40-foot metal energy storage cabinets, the system can scale out from 295 kW to 4. Per Cabinet Modules 16 (charge) Power: 5kW: Charge: continuous / peak: 5kW:. It is usually used to provide backup power and stabilize grid. The core components of an energy storage battery cabinet determine its performance and reliability. Most systems rely on lithium-ion batteries because they provide high efficiency and long cycle life. The cabinet organizes these batteries safely, keeps. SOFAR Energy Storage Cabinet adopts a modular design and supports flexible expansion of AC and DC capacity; the maximum parallel power of 6 cabinets on the AC side covers 215kW-1290kW; the capacity of 3 battery cabinets can be added on the DC side, and the capacity expansion covers 2-8 hours.
