

# Where to install the photovoltaic snow shield

## Overview

---

They attach directly to the panel frames, making them easy to install.

**Adjustable:** They can be repositioned as needed. Snow fence guards are installed above your solar panels. If you live in an area where snow falls and accumulates to several inches, like the north or in the mountains, you should absolutely install snow guards during the initial installation of your solar panels. Why?

Installing snow guards with your new solar panels will save you a lot of money and. A thoughtfully engineered PV mounting system is the foundation of a resilient and productive solar installation in cold climates. A study by the National Renewable Energy Laboratory found that snow coverage can reduce annual energy production by up to 15% in snowy regions. However, with proper mounting solutions, this loss can be minimized to less than 5%. Several mounting options cater to snowy environments, each with its. Solar panels still work in snowy weather and snow tends to slide right off their sleek, glass surface to prevent sunlight blockage. Copyright 2023 Sno Shield | All Rights Reserved.

## Where to install the photovoltaic snow shield
