

**Which city has the solar panels**

## Overview

---

Honolulu is the top city powered by solar energy in the United States. 88 watts of solar photovoltaic capacity per capita and a total of 292. Being considered as the greenest city in the US, San Diego was the first major US city to commit to 100% renewable energy, which they are most likely going to achieve this year. Currently, rooftop solar panels are generating more than 37 megawatts of green energy, making San Diego a solar-power. After years of relative quiet, Tesla's factory in Buffalo, New York, has been repurposed back to its original purpose: to make solar panels. 2 million ft<sup>2</sup> facility received a nearly \$1 billion investment from New York State, and local organizations have been questioning Tesla's employment. These are the cities that have the most solar energy potential based on solar energy production potential in megawatt-hours per year per capita: Not surprisingly, cities with warm, sunny climates rank highly on the list.

## Which city has the solar panels
