

# Wind power generation project guidelines

## Overview

---

The Guidebook's chapters address important aspects of wind energy project siting, including environmental considerations, community impacts, permitting information, and other key topics. You can download the full Wind Guidebook [PDF] or access individual chapters below. As wind energy production increases, both developers and wildlife agencies have recognized the need for a system to evaluate and address the potential. The following outline identifies the minimum requirements for an initial wind energy Plan of Development (POD) to be submitted prior to the end of the 3-year term of a site testing and monitoring authorization. These minimum requirements provide the basic information necessary to begin the National. This guide provides information and resources intended to support readers in building a foundation of knowledge about offshore wind energy. This guide was authored by Matilda Kreider, Frank Oteri, Clara Houghteling, Alexandra Casey, and Chloe Constant (National Renewable Energy Laboratory). Guidelines for Development of Onshore Wind Power Projects.
